1 FileStat-Msgs

The FileStat-Msgs.cpy copybook contains an EVALUATE statement to translate the two-digit file status codes that may be generated by file I/O statements.

The copybook assumes that the file status data item name is "STATUS" and the error message data item is named "MSG". By using the COPY statement's REPLACING clause, however, you may use the data names you wish, as follows:

```
COPY FileStat-Msgs
    REPLACING STATUS BY file-status-data-item-name
                    MSG      BY error-message-data-item-name
```

Here's the current FileStat-Msgs.cpy copybook:

EVALUATE STATUS	
WHEN 00 MOVE 'SUCCESS	' TO MSG
WHEN 02 MOVE 'SUCCESS DUPLICATE	' TO MSG
WHEN 04 MOVE 'SUCCESS INCOMPLETE	' TO MSG
WHEN 05 MOVE 'SUCCESS OPTIONAL	' TO MSG
WHEN 06 MOVE 'LS Multiple records	' TO MSG
WHEN 07 MOVE 'SUCCESS NO UNIT	' TO MSG
WHEN 10 MOVE 'END OF FILE	' TO MSG
WHEN 14 MOVE 'OUT OF KEY RANGE	' TO MSG
WHEN 21 MOVE 'KEY INVALID	' TO MSG
WHEN 22 MOVE 'KEY EXISTS	' TO MSG
WHEN 23 MOVE 'KEY NOT EXISTS	' TO MSG
WHEN 24 MOVE 'KEY BOUNDARY VIOLATION	' TO MSG
WHEN 30 MOVE 'PERMANENT ERROR	' TO MSG
WHEN 31 MOVE 'INCONSISTENT FILENAME	' TO MSG
WHEN 34 MOVE 'BOUNDARY VIOLATION	' TO MSG
WHEN 35 MOVE 'FILE NOT FOUND	' TO MSG
WHEN 37 MOVE 'PERMISSION DENIED	' TO MSG
WHEN 38 MOVE 'CLOSED WITH LOCK	' TO MSG
WHEN 39 MOVE 'CONFLICT ATTRIBUTE	' TO MSG
WHEN 41 MOVE 'ALREADY OPEN	' TO MSG
WHEN 42 MOVE 'NOT OPEN	' TO MSG
WHEN 43 MOVE 'READ NOT DONE	' TO MSG
WHEN 44 MOVE 'RECORD OVERFLOW	' TO MSG
WHEN 46 MOVE 'READ ERROR	' TO MSG
WHEN 47 MOVE 'INPUT DENIED	' TO MSG
WHEN 48 MOVE 'OUTPUT DENIED	' TO MSG
WHEN 49 MOVE 'I/O DENIED	' TO MSG
WHEN 51 MOVE 'RECORD LOCKED	' TO MSG
WHEN 52 MOVE 'END-OF-PAGE	' TO MSG
WHEN 57 MOVE 'I/O LINAGE	' TO MSG
WHEN 61 MOVE 'FILE SHARING FAILURE	' TO MSG
WHEN 71 MOVE 'BAD CHARACTER	' TO MSG
WHEN 91 MOVE 'FILE NOT AVAILABLE	' TO MSG

```
WHEN OTHER MOVE 'UNKNOWN ERROR'          , TO MSG
END-EVALUATE.
```

2 COBDUMP

COBDUMP is a useful little utility subroutine to produce a formatted hexadecimal and character dump of the data area passed to it.

If you follow the GnuCOBOL forums, you've undoubtedly heard about the CBL_OC_DUMP subroutine that was the winning entry in a GnuCOBOL programming contest. It's a great tool for producing data dumps, and it's now included in the official GnuCOBOL distributions.

For now though, I'll keep using my good ol' "COBDUMP" routine. It's been my travelling companion from COBOL job to COBOL job since 1971. Here it is, all tuned up for GnuCOBOL, with new tires and a fresh coat of paint.

In addition to general GnuCOBOL concepts, this program provides a useful demonstration of the following:

- Coding a GnuCOBOL subroutine
- Using **USAGE POINTER** data items
- Using the **ANY LENGTH** data item attribute
- Coding for an **OPTIONAL** subprogram argument
- Using the **NUMBER-OF-CALL-PARAMETERS** special register
- Using the **C\$PRINTABLE** built-in system subroutine

The program source and cross-reference listing, produced using the GnuCOBOL Interactive Compiler front-end (GCic.cbl, one of the sample programs included here), begins on the next page.

3 Colors

Colors is a handy little GnuCOBOL utility program that will produce a screen showing all possible combinations of:

- FOREGROUND-COLOR
- BACKGROUND-COLOR
- BLINKING (or absence of BLINKING)
- HIGHLIGHT, LOWLIGHT or absence of either (i.e. "Normal")
- REVERSE-VIDEO

Here is a sample of the screen generated by this program:

The program source and cross-reference listing, produced using the cobxref, begins on the next page.

```

4 DAY-FROM-DATE

DAY-FROM-DATE is a user-defined function that accepts a single numeric USAGE DISPLAY argument –æ either a 7-digit Julian date in the form *yyyyddd* or an 8-digit Gregorian date in the form *yyyymmdd*. This argument may be supplied either as a PIC 9(n) USAGE DISPLAY data item (n=7 or 8) or as a 7- or 8-digit numeric literal.

The subroutine will determine if the supplied date is a valid date in the year range 0000 through 9999 and what day of the week that date fell on.

The value returned will be zero if the date argument was invalid or an integer in the range 1-7, representing Sunday through Saturday.

In addition to general GnuCOBOL concepts, this program provides a useful demonstration of the following:

- Coding a GnuCOBOL user-defined function
- Using the ANY LENGTH data item attribute
- Using the RETURNING option in a subprogram
- Using the DATE-OF-INTEGER intrinsic function
- Using the C\$PARAMSIZE built-in system subroutine

The program source and cross-reference listing, produced using the GnuCOBOL Interactive Compiler front-end (GCic.cbl, one of the sample programs included here), begins on the next page.

5 GCic

This is MUCH more than a mere demonstration program – it's also a very practical utility! The "GCic" (GnuCOBOL Interactive Compiler) is a TUI (Textual User Interface) program that may be used as a full-screen interface to the "cobic" compiler. In addition, GCic can produce neat, concise and useful cross-reference listings of GnuCOBOL programs, showing not only where user-defined names and built-in registers and intrinsic functions are referenced, but also where user-defined data items ARE MODIFIED by program code!

The program is well documented (IMHO) and you should find it fairly easy to follow. The GCic.cbl program was written to work with a native Windows or Windows/MinGW build of GnuCOBOL as well as a Windows/Cygwin, UNIX or OS X build.

Source listings generated by GCic will show the original source code of your programs, with all indentation and comments preserved. Additionally, any COPYed code will be included in the listing immediately (in compressed form) following the COPY statement that triggered its inclusion into your program.

Cross-reference listings will show all user-defined data items and procedures as well as intrinsic function and special register references. In addition to showing the line numbers at which items were defined and referenced, those references that MODIFY the contents of the data item will have an asterisk appended to them.

In addition to general GnuCOBOL concepts, this program provides a useful demonstration of the following:

- Creating a GnuCOBOL compilation unit that consists of multiple programs
- Using CDF conditional compilation facilities
- Using the SCREEN SECTION and associated ACCEPT and DISPLAY statements
- Using DECLARATIVES to trap file I/O errors
- Using FILE-STATUS
- Using the REPLACING clause on a CDF COPY statement
- Using the following statements:
 - ACCEPT FROM COMMAND-LINE statement
 - ACCEPT FROM DATE/TIME statement
 - ACCEPT FROM ENVIRONMENT statement
 - EXIT PERFORM statement
 - EXIT SECTION statement
 - INSPECT statement
 - PERFORM FOREVER statement
 - SEARCH ALL statement
 - SET ENVIRONMENT statement
 - SORT statement
 - STRING statement
 - UNSTRING statement

- Using the following built-in subroutines:
 - C\$JUSTIFY built-in system subroutine
 - C\$SLEEP built-in system subroutine
 - CBL_CHANGE_DIR built-in system subroutine
 - CBL_CHECK_FILE_EXIST built-in system subroutine
 - CBL_DELETE_FILE built-in system subroutine
 - SYSTEM built-in system subroutine
- Using the following intrinsic functions:
 - CONCATENATE intrinsic function
 - LENGTH intrinsic function
 - LOWER-CASE intrinsic function
 - NUMVAL intrinsic function
 - TRIM intrinsic function
 - UPPER-CASE intrinsic function
- Using the COB-CRT-STATUS,Special Registers special register
- Programmatically producing a report destined for either portrait or landscape printing

Here is a sample of the screen generated by this program:

The screenshot shows the GCic (GNU COBOL Interactive Compilation) interface. The title bar reads "GCic (2013/12/26 10:16) GNU COBOL 2.1 23NOV2013 Interactive Compilation". The main area displays the following information:

```

109      *> DATE CHANGE DESCRIPTION          **
110      *> ====== ==
111      *> GC0609 Don't display compiler messages file if compilation  **
112      *> GLC  Is successful. Also don't display messages if the   **
113      *>       output file is busy (just put a message on the    **
114      *>       screen, leave the OC screen up & let the user fix   **
115      *>       the problem & resubmit.                         **
116      *> GC0709 When 'EXECUTE' is selected, a 'FILE BUSY' error will  **
117      *> CLC  still cause the (old) executable to be launched.   **
118      *>       Also, the 'EXTRA SWITCHES' field is being ignored.  **
119      *>       Changed the title bar to lowlighted reverse video &  **
120      *>       the message area to highlighted reverse-video.    **
121      *> GC0809 Add a SPACE in front of command-line args when  **
122      *> GLC  executing users program. Add a SPACE after the   **
123      *>       -ftraceall switch when building cobc command.  **
124      *> GC0909 Convert to work on Cygwin/Linux as well as MinGW  **
125      *> GC0310 Virtualized the key codes for S-F1 thru S-F7 as they  **
126      *> GLC  differ depending upon whether PDCurses or NCurses is  **
127      *>       being used.                                         **
128      *> GC0410 Introduced the cross-reference and source listing  **
129      *> GLC  features. Also fixed a bug in EXTRA switch proces-  **
130      *>       sing where garbage will result if more than the   **
131      *>       EXTRA switch is specified.                         **
132      *> GC1010 Corrected several problems reported by Vince Coen:  **
133      *> GLC  1) Listing/Xref wouldn't work if '-I' additional   **
134      *>       cobc switch specified.                         **
135      *> 2) Programs coded with lowercase reserved words did   **
136      *>       not get parsed properly when generating listing   **
137      *>       and/or xref reports.                           **
138      *> 3) Reliance on a TEMP environment variable caused   **
139      *>       non-recoverable errors when generating listing   **
140      *>       and/or xref reports in a session that lacks a   **
141      *>       TEMP variable.                            **
142      *> As a result of this change, GCic no longer runs a   **
143      *>       second 'cobc' when generating listing and/or xref   **
144      *>       reports. A '-save-temp' (without '=dir') specified  **
145      *>       in the EXTRA options field will be ignored. A   **
146      *>       '-save-temp=dir' specified in the EXTRA options   **
147      *>       field will negate both the XREF and SOURCE opts,   **
148      *>       if specified.                                **
149      *> GC0711 Tailored for 29APR2011 version of GNU COBOL 2.0  **
150      *> GC0712 Replaced all switches with configuration settings;  **
151      *> GLC  Tailored for 11FEB2012 version of GNU COBOL 2.0;  **
152      *>       Reformatted screen layout to fit a 24x80 screen   **
153      *>       rather than a 25x81 screen and to accommodate shell   **
154      *>       environments having only F1-F12 (like 'terminal' in   **
155      *>       OSX); Fully tested under OSX (required a few altera-  **
156      *>       tions); Expanded both extra-options and runtime-  **
157      *>       arguments areas to TWO lines (152 chars total) each;  **
158      *>       Added support for MF/IBM/BS2000 listing-control   **
159      *>       directives EJECT,SKIP1,SKIP2,SKIP3 (any of these in   **
160      *>       copybooks will be ignored)                         **
161      *> GC0313 Expand the source code record from 80 chars to 256  **
162      *> GLC  to facilitate looking for "LINKAGE SECTION" in a   **

```

163      *>      free-format file.          **
164      *> GC1113 Edited to support the change of "OpenCOBOL" to "GNU"  **
165      *> GLC COBOL"                  **
166      *> GC1213 Updated for 23NOV2013 version of GNU COBOL 2.1    **
167      *> GC0114 Introduce a "Press ENTER to Close" action after run-  **
168      *> GLC ning the compiled program in the compiler window (F4)**
169      *> VC0617 Remove the Blinking in meny screen as uncomfortable  **
170      *> VBC Update version printed to 2.2 30JUN2017.                **
171      *> Move the system constant settings to a copy file            **
172      *> const-set-1.cpy in case GCic is updated.                    **
173      *> Added SET ENVIRONMENT "COB_EXIT_WAIT" TO "0" to           **
174      *> 100-Initialization section.                                **
175      *> VC0717 Replaced compile param intrinsic=all with           **
176      *> VBC intrinsics=ALL. Changed mod detail inits for Gary   **
177      *> from GCL to GLC.                                         **
178      *> Update version printed to 2.2 20JUL2017.                **
179      *> Should really get this from the compiler if avail?       **
180      *> VC1217 Update compiler version to v3.0 24DEC2017.        **
181      *> and copyright to 2018 (in 3 places).                   **
182      *> VC0811 Updated compiler to 3.1 July2020 and the copyright.  **
183      *> VC0322 Update compiler version to v3.1.2 06MAR2022.       **

6 STREAMIO

STREAMIO is a utility I created to assist with handling stream I/O functions. I've used it to construct a number of useful little command-line utilities.

Usage of this subroutine is completely documented in the program comments. The program COPY's a copybook named STREAMIOcb, the format of which is described in the program comments.

Both STREAMIO.cbl and STREAMIOcb.cpy are included in the "samples" directory of any pre-built distributions of GnuCOBOL that I have created.

In addition to general GnuCOBOL concepts, this program provides a useful demonstration of the following:

- Coding a GnuCOBOL subroutine
- Using the **REPLACING** clause on a CDF **COPY** statement
- Using hexadecimal alphanumeric literals
- Using the following statements:
 - **ACCEPT FROM ENVIRONMENT** statement
 - **INSPECT** statement
 - **STRING** statement
- Using the following built-in subroutines:
 - **C\$PARAMSIZE** built-in system subroutine
 - **CBL_CLOSE_FILE** built-in system subroutine
 - **CBL_DELETE_FILE** built-in system subroutine
 - **CBL_EXIT_PROC** built-in system subroutine
 - **CBL_OPEN_FILE** built-in system subroutine
 - **CBL_READ_FILE** built-in system subroutine
 - **CBL_WRITE_FILE** built-in system subroutine
- Using the following intrinsic functions:
 - **RANDOM** intrinsic function
 - **TRIM** intrinsic function

First, here is the STREAMIOcb.cpy copybook:

```

05 SCB-Handle-NUM          PIC X(4) COMP-X.
05 SCB-Mode-CD             PIC X(1).
  88 SCB-MODE-Input-BOOL   VALUE 'I', 'i'.
  88 SCB-MODE-Output-BOOL  VALUE 'O', 'o'.
  88 SCB-MODE-Both-BOOL    VALUE 'B', 'b'.
05 SCB-Function-CD         PIC X(2).
  88 SCB-Func-CLOSE-BOOL   VALUE 'C ', 'c '.
  88 SCB-Func-DELETE-BOOL  VALUE 'D ', 'd '.
  88 SCB-Func-OPEN-BOOL    VALUE 'O ', 'o '.
  88 SCB-Func-READ-BOOL    VALUE 'R ', 'r '.
  88 SCB-Func-READ-Delim-BOOL  VALUE 'RD', 'rd',
                                'rD', 'Rd'.
  88 SCB-Func-WRITE-BOOL   VALUE 'W ', 'w '.
  88 SCB-Func-WRITE-Delim-BOOL  VALUE 'WD', 'wd',
                                'wD', 'Wd'.
05 SCB-Delimiter-Mode-CD   PIC X(1).
  88 SCB-DELIM-Unix-BOOL   VALUE 'U', 'u'.
  88 SCB-DELIM-Windows-BOOL  VALUE 'W', 'w'.
05 SCB-Offset-NUM           PIC X(8) COMP-X.
05 SCB-Error-Routine-PTR    USAGE PROGRAM-POINTER.
05 SCB-Error-Routine-NUM REDEFINES SCB-Error-Routine-PTR
                            USAGE BINARY-LONG.
05 SCB-Return-CD            USAGE BINARY-LONG.
05 SCB-Filename-TXT         PIC X(256).

```

The program source and cross-reference listing, produced using the GnuCOBOL Interactive Compiler front-end (GCic.cbl, one of the sample programs included here), begins on the next page.

6      *>                                **
7      *> This routine centralizes all bytestream file I/O functions  **
8      *> into one routine. The manner in which this routine is        **
9      *> CALLED is as follows:          **
10     *>                                **
11     *>           CALL "STREAMIO" USING control-block [ , arg2 ]    **
12     *>                                **
13     *> where 'control-block' is defined by the "STREAMIOcb.cpy"   **
14     *> copybook and 'arg2' will vary, depending upon the function   **
15     *> specified in the control block.          **
16     *>                                **
17     *> The STREAMIO routine has an advantage over the various      **
18     *> "CBL_xxxxxx_FILE" routines in that:          **
19     *>                                **
20     *> 1. It automates the establishment and on-going adjustment of  **
21     *>     the file-offset value in such a way as to simplify the      **
22     *>     sequential processing of a bytestream file (you may still  **
23     *>     specify a file-offset manually on each read or write, if  **
24     *>     you wish)          **
25     *>                                **
26     *> 2. It auto-detects the size of the I/O buffer you supply to  **
27     *>     STREAMIO, using that as the byte-count of all read and      **
28     *>     write operations.          **
29     *>                                **
30     *> 3. Not only does it support the raw input and output of data  **
31     *>     that the CBL_READ_FILE and CBL_WRITE_FILE routines do,       **
32     *>     but on input it is also capable of delivering just a        **
33     *>     single newline-delimited or carriage-return/newline de-  **
34     *>     limited record to the caller.          **
35     *>                                **
36     *> 4. On output, STREAMIO can optionally append either a new-    **
37     *>     line or carriage-return/newline sequence (your choice) to  **
38     *>     the end of every record it writes.          **
39     *>                                **
40     *> 5. STREAMIO can automatically generate filenames for output  **
41     *>     files if you wish, simplifying the process of creating    **
42     *>     scratch or work files.          **
43     *>                                **
44     *> 6. The STREAMIO routine also allows you to (optionally) re-  **
45     *>     gister a general error-handling routine to be given con-  **
46     *>     trol should a fatal error be detected with STREAMIO.          **
47     *>                                **
48     *>     This routine can be "turned on" and "turned off" at will.  **
49     *>                                **

7 GNU Free Documentation License

Version 1.3, 3 November 2008

Copyright © 2000, 2001, 2002, 2007, 2008 Free Software Foundation, Inc.
<https://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

0. PREAMBLE

The purpose of this License is to make a manual, textbook, or other functional and useful document *free* in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or non-commercially. Secondarily, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.

This License is a kind of “copyleft”, which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.

We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

1. APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The “Document”, below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as “you”. You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.

A “Modified Version” of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.

A “Secondary Section” is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document’s overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.

The “Invariant Sections” are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none. The “Cover Texts” are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.

A “Transparent” copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not “Transparent” is called “Opaque”.

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, \LaTeX input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The “Title Page” means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, “Title Page” means the text near the most prominent appearance of the work’s title, preceding the beginning of the body of the text.

The “publisher” means any person or entity that distributes copies of the Document to the public.

A section “Entitled XYZ” means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as “Acknowledgements”, “Dedications”, “Endorsements”, or “History”.) To “Preserve the Title” of such a section when you modify the Document means that it remains a section “Entitled XYZ” according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

- A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.
- B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.
- C. State on the Title page the name of the publisher of the Modified Version, as the publisher.
- D. Preserve all the copyright notices of the Document.
- E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.
- F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.
- G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document's license notice.
- H. Include an unaltered copy of this License.
- I. Preserve the section Entitled "History", Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled "History" in the Document, create one stating the title, year, authors, and publisher of the Document as given on its Title Page, then add an item describing the Modified Version as stated in the previous sentence.
- J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the "History" section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.
- K. For any section Entitled "Acknowledgements" or "Dedications", Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.
- L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.
- M. Delete any section Entitled "Endorsements". Such a section may not be included in the Modified Version.
- N. Do not retitle any existing section to be Entitled "Endorsements" or to conflict in title with any Invariant Section.
- O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version's license notice. These titles must be distinct from any other section titles.

You may add a section Entitled "Endorsements", provided it contains nothing but endorsements of your Modified Version by various parties—for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled "History" in the various original documents, forming one section Entitled "History"; likewise combine any sections Entitled "Acknowledgements", and any sections Entitled "Dedications". You must delete all sections Entitled "Endorsements."

6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an “aggregate” if the copyright resulting from the compilation is not used to limit the legal rights of the compilation’s users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document’s Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled “Acknowledgements”, “Dedications”, or “History”, the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <https://www.gnu.org/licenses/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License “or any later version” applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy’s public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

11. RELICENSING

“Massive Multiauthor Collaboration Site” (or “MMC Site”) means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A “Massive Multiauthor Collaboration” (or “MMC”) contained in the site means any set of copyrightable works thus published on the MMC site.

“CC-BY-SA” means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

“Incorporate” means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is “eligible for relicensing” if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.
